

The background image is a high-angle landscape photograph. In the foreground, there are rocky, light-colored slopes with some green shrubs and small trees. The middle ground shows a deep valley with a dense forest of evergreen trees. A small, calm lake is visible in the valley. The background features more mountain ranges under a bright blue sky with scattered white clouds. The text is overlaid on the upper portion of the image.

Health Data Summaries For California Counties 2006

HEALTH DATA SUMMARIES FOR CALIFORNIA COUNTIES 2006

Prepared by:
Sally Jew-Lochman
Department of Health Services
Planning and Data Analysis Section

Sacramento, CA 95899-7410

Karen Flannigan, Chief
Planning and Data Analysis Section

Michael Quinn, Chief
Office of Health Information and Research

Teresita Trinidad, M.S., Chief
Center for Health Statistics

Gregory Franklin, M.H.A., Deputy Director
Health Information and Strategic Planning

Mark B. Horton, M.D., M.S.P.H.
State Public Health Officer

Sandra Shewry, Director
Department of Health Services

Kimberly Belshé, Secretary
Health and Human Services Agency

Arnold Schwarzenegger, Governor
State of California

ACKNOWLEDGEMENTS

The willing cooperation and assistance of a large number of people made this report possible. Data for this report were provided by various Federal and State agencies including the U.S. Census Bureau; Centers for Medicare and Medicaid Services; the California Department of Health Services; Department of Finance; Department of Social Services; Department of Developmental Services; Department of Rehabilitation; Department of Mental Health; Department of Education; Department of Justice, Employment Development Department; California Highway Patrol; Department of Alcohol and Drug Programs; Department of Consumer Affairs; Board of Dental Examiners and Medical Board of California; and the Office of Statewide Health Planning and Development.

Those persons who provided assistance on this report include:

Kamal Bindra
Stan Bissell
Graydon Bezanson
Tim Croisdale
Krista Christian
Jim Klein

Brian Lueck
Marjorie MarLiu
Bob Mone
Linda Nance
Lucille Pacheco
Maggie Petersen

Malinda Petersen
Jan Rains
Susann Steinberg
Laurie Vazquez
Charlene Wolfe
Helen Zheng

Additionally, since the majority of indicators in this report are derived from California's vital statistics data system, appreciation is expressed to all Office of Vital Records staff who collect, verify, code and process California's birth, death, and fetal death certificates. TABLE OF CONTENTS

Introduction	i
Map of California Counties.....	ii
Section I: County and State Health Data Summaries	1
Section II: Cross-County Comparisons	239
City Health Department Data	264
Section III: Data Definitions, Sources, Formulas, and Footnotes.....	265

INTRODUCTION

The purpose of this report is to present, in a single volume, a county specific baseline of data that describe:

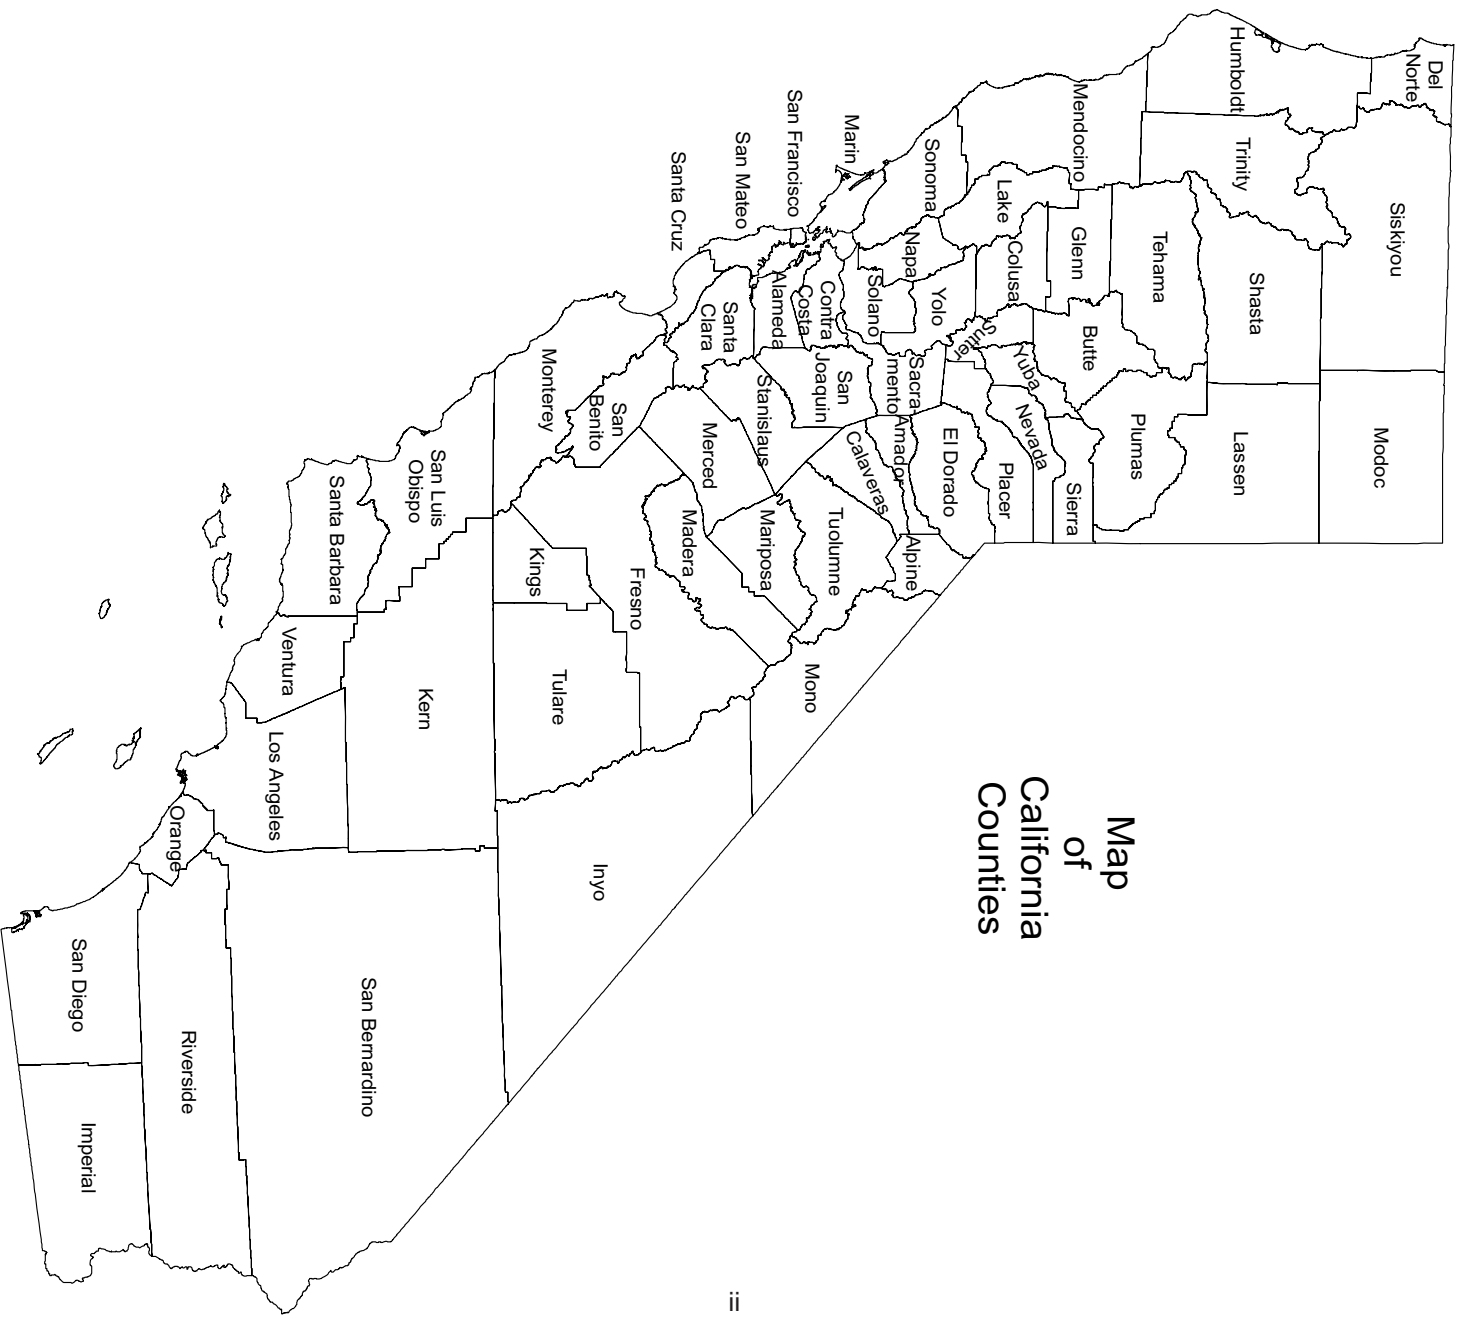

Population	Age-Adjusted and Age-Specific Death Rates	Medi-Cal and Medicare Data
Socioeconomic Status	Mortality by Cause of Death	Health Services Utilization
Birth Data	Communicable Disease Data	Health Resources
Infant, Neonatal and Perinatal Deaths	County Health Indicators	

This report is divided into three sections. Section I presents over 180 health and socio-economic indicators for each County. Section II presents these same indicators in a manner that facilitates cross-county comparisons. Section III presents the definitions and data sources for each indicator as well as the footnotes. Each section includes a detailed table of contents. Data presented in this report are not intended to be exhaustive but will strive to present a balance of frequently requested data from various sources at the State and Federal levels. For each indicator, the specific source used in acquiring the data is identified in Section III so that the user can obtain more detailed information if desired. This report contains the most recent point-in-time data for each indicator.

IMPORTANT NOTE: When making cross-county comparisons, it is important to remember that many of the rates presented in this report for small populations in geographic areas, as well as those rates based on a small number of events for larger populations, e.g., infant death rates by race, can fluctuate significantly from year-to-year. Consequently, rates that are based on too few events have an asterisk (*) next to them that indicates that the rate is unreliable (relative standard error or coefficient of variance is greater than or equal to 23 percent). A standard error is indeterminate if the number of events is equal to zero, which is indicated with a plus sign (+). The symbol “a” denotes that a rate was not calculated if the number was greater than zero and less than 5 events. The symbol “b” denotes that a rate was not calculated due to fewer than 1,000 births in a county/city of residence or occurrence, or in a specific age group in accordance with standard statistical procedure. The underreporting of certain events, e.g., communicable diseases, can also contribute to county differences in some of these indicators. Therefore, caution should be used when making cross-county comparisons only on the indicators in this report. A more thorough analysis of county differences should include an examination of trend data over several years and the effects of sampling variability (see Joel C. Kleinman, Statistical Notes for Health Planners, “Mortality”, Number 3, National Center for Health Statistics, February 1977).

Questions concerning the County Health Data Summaries and suggestions for inclusion of additional data items in future reports should be directed to:

Health Data Summaries for California Counties 2006

Center for Health Statistics, Department of Health Services

a Rates and ratios are not calculated if greater than zero, but fewer than five events.

b Rates and ratios are not calculated for fewer than 1,000 population in a county of a specific age group.

See Section III for data definitions, sources, and notes.

Health Data Summaries for California Counties 2006
Center for Health Statistics, Department of Health Services

* Death rate unreliable because the relative standard error is greater than or equal to 23 percent.

+ Standard error is indeterminate because the rate is based on zero events.

See Section III for data definitions, sources, and notes.

Health Data Summaries for California Counties 2006
Center for Health Statistics, Department of Health Services

a Rates and ratios are not calculated for > 0 and < 5 events.
b Rates and ratios are not calculated for fewer than 1,000
births in a county or specified age group.

See Section III for data definitions, sources, and notes.

* Death rate unreliable because the relative standard error
is greater than or equal to 23 percent.

+ Standard error is indeterminate because the rate is based
on zero events.

Health Data Summaries for California Counties 2006
Center for Health Statistics, Department of Health Services

++ Sutter and Yuba counties combine treatment services. Admission numbers are shown under Yuba county.
^ Greater than zero and less than four observations.

See Section III for data definitions, sources, and notes.
* Death rate is unreliable because the relative standard error is greater than or equal to 23 percent.
+ Standard error is indeterminate because the rate is based on zero events.

Health Data Summaries for California Counties 2006
Center for Health Statistics, Department of Health Services

a Rates and ratios are not calculated if greater than zero, but fewer than five events.
b Rates and ratios are not calculated for fewer than 1,000 births in a city or specific age group.

See Section III for data definitions, sources, and notes.
* Death rate is unreliable because the relative standard error is greater than or equal to 23 percent.

POPULATION CHARACTERISTICS (Table 1)

DATA ITEM	DEFINITION/DESCRIPTION	DATA SOURCES
Population Number		
2000 Census Population	Actual California and county populations based on 2000 Census.	U.S. Census Bureau. Census 2000, Summary File 1.
Projection for Year: 2004	Estimated state, county, and city health jurisdiction populations.	State of California, Department of Finance, Demographic Research Unit. Race/Ethnic Population with Age and Sex Detail, 2000-2050, May 2004.
Projection for Year: 2010		State of California, Department of Finance. E-4 Population Estimates for Cities, Counties and the State, 2001-2006, with 2000 Benchmark, May 2006.
Projection for Year: 2020		
By Age Group		
Under Age 5	Percent of total 2004 population in specified age groups.	State of California, Department of Finance, Demographic Research Unit. Race/Ethnic Population with Age and Sex Detail, 2000-2050, May 2004.
Age 5-17		
Age 18-64		
Age 65+		
By Sex		
Females	Percent of total 2004 population by gender.	State of California, Department of Finance, Demographic Research Unit. Race/Ethnic Population with Age and Sex Detail, 2000-2050, May 2004.
Males		
By Race/Ethnicity		
White	Percent of total 2004 population by specified race/ethnic group. White includes Other and Unknown races. Race groups for White, Black, Asian/Pacific Islander, American Indian/Alaska Native, and persons identifying Two or More Races exclude persons of Hispanic ethnicity. Hispanic ethnicity includes any race group.	State of California, Department of Finance, Demographic Research Unit. Race/Ethnic Population with Age and Sex Detail, 2000-2050, May 2004.
Black		
Hispanic		
Asian/Pacific Islander		
American Indian/ Alaska Native		
2 or More Race Groups		
Urban/Rural		
Urban	Percent of total 2000 population living in urban or rural areas. Urban includes places of 2,500 or more persons incorporated as cities, villages, boroughs, and towns.	U.S. Census Bureau. Census 2000 of Population and Housing, Summary File 3.
Rural		

SOCIOECONOMIC CHARACTERISTICS (Table 2)

DATA ITEM	DEFINITION/DESCRIPTION	DATA SOURCES
Below Poverty Level	<p>1999 data. Federally established "poverty" thresholds include family income for two persons at \$10,869, four persons at \$17,029, and six persons at \$22,727.</p> <p>Persons in the Two or More Races group are not included in the single race groups. White includes a "Some Other Race" category. Single race groups for White, Black, Asian/Pacific Islander, American Indian/Alaska Native, and persons identifying Two or More Races may also include persons of Hispanic ethnicity. Hispanic ethnicity includes any race group.</p>	U.S. Census Bureau, Census 2000 of Population and Housing, Summary File 3.
Total Population Children under 6 Persons Age 65 + White Black Hispanic Asian/Pacific Islander American Indian/Alaska Native Two or More Races		
Income/Housing Value	Census 1999 data. Census 2000 data.	U.S. Census Bureau, Census 2000 of Population and Housing, Summary File 3.
Median Family Income Median Housing-Unit Value		
CalWORKS	CalWORKS January 2005 data. Percent of total 2005 population receiving CalWORKS assistance.	State of California, Department of Social Services, Research and Development Division. Annual Trends. State of California, Department of Finance, Demographic Unit, 2005 Population: Report E-1 City/County Population Estimates, May 2005.
CalWORKS Recipients as a Percent of County/State Population		
SSI/SSP	SSI/SSP December 2004 data. Percent of total 2004 population receiving SSI/SSP assistance.	Social Security Administration, Office of Policy. SSI Recipients by State and County, 2004. March 2005. State of California, Department of Finance, E-2 California County Population Estimates and Components of Change by Year, July 1, 2000-2004. February 2005.
SSI/SSP Recipients as a Percent of County/State Population		
Unemployment	Annual average percentage of the 2005 monthly civilian labor force that was employed.	State of California, Employment Development Department, Labor Market Information Division, Monthly Labor Force Data for Counties, Annual Average 2005, Not Seasonally Adjusted, March 3, 2006.
% Of Civilian Labor Force Unemployed		
Education	Percent of 2000 population not finishing high school. Grades K-12 enrollment for public and private schools for FY 2004-2005.	U.S. Census Bureau, Census 2000 of Population and Housing, Summary File 3. State of California, Department of Education, Enrollment Data FY 2004-2005.
% Age 25+ Not Finishing High School		
Enrollment K-12		

LIVE BIRTHS (Table 3)

DATA ITEM	DEFINITION/DESCRIPTION	DATA SOURCES
Live Birth Numbers/Rates		
Number of Live Births by: County of Residence County of Occurrence Birth Rate	<p>Number of 2004 live births by place of residence.</p> <p>Number of 2004 live births in the county regardless of the place of residence.</p> <p>Crude birth rate for 2004 county residents per 1,000 estimated population.</p>	<p>State of California, Department of Health Services, Birth Records.</p> <p>State of California, Department of Finance, Demographic Research Unit, Race/Ethnic Population with age and Sex Detail, 2000-2050, May 2004.</p>
By Race/Ethnicity		
White Black Hispanic Asian/Pacific Islander American Indian/Alaska Native Two or More Races	<p>Percent of total 2004 births by mother's specified race/ethnic group.</p> <p>White includes Other and Unknown races. Race groups for White, Black, Asian/Pacific Islander, American Indian/Alaska Native, and mothers identifying Two or More Races exclude mothers of Hispanic ethnicity. Hispanic ethnicity includes any race group.</p>	State of California, Department of Health Services, Birth Records.
Birthweights		
% Low Birthweight % Very Low Birthweight	<p>Percent of 2004 live births with infants weighing less than 2,500 grams.</p> <p>Percent of 2004 live births with infants weighing less than 1,500 grams.</p>	State of California, Department of Health Services, Birth Records.
Teen Births/Marital Status		
% Of Mothers under Age 18 Years % Not Married	<p>Percent of 2004 live births to mothers under age 18.</p> <p>Percent of 2004 live births to mothers who were not married.</p> <p>Starting in 1997 marital status is determined through verbal response by the mother when the birth certificate is completed. Prior to 1997, the marital status was estimated.</p>	State of California, Department of Health Services, Birth Records.

LIVE BIRTHS (Continued)

DATA ITEM	DEFINITION/DESCRIPTION	DATA SOURCES
Education		
% Mothers under 12 Years of Education	Percent of 2004 live births to mothers with less than 12 years of reported education.	State of California, Department of Health Services, Birth Records.
Prenatal Care		
% No First Trimester Prenatal Care	Percent of 2004 live births for which there were "zero" prenatal care visits reported or care began in the second or third trimester of pregnancy.	State of California, Department of Health Services, Birth Records.
Delivery Method		
% By Cesarean Section	Percent of 2004 live births with method of delivery reported as cesarean section.	State of California, Department of Health Services, Birth Records.
Out-of-County Births		
% Born Out-of-County	Percent of 2004 live births occurring outside the county of residence of the mother.	State of California, Department of Health Services, Birth Records.
Method of Payment		
% Funded by Medi-Cal/Other Government	Percent of 2004 live births with Medi-Cal or other government program reported as the expected principal source of payment for delivery.	State of California, Department of Health Services, Birth Records.
% Funded by HMO/Prepaid	Percent of 2004 live births with HMO or prepaid health plan reported as the expected principal source of payment for delivery.	
% Funded by Private Insurance	Percent of 2004 live births with private insurance reported as the expected principal source of payment for delivery.	
Fertility Rate		
General Fertility Rate	Three-year average number of 2002-2004 live births by mother's residence per 1,000 estimated 2003 female population of childbearing age (15-44).	State of California, Department of Health Services, Birth Records.

DEATHS (Tables 4, 5, and 6)

DATA ITEM	DEFINITION/DESCRIPTION	DATA SOURCES
Number of Deaths		
Deaths by County of Residence	Number of county resident deaths for calendar year 2004.	State of California, Department of Health Services, Death Records.
Deaths by County of Occurrence	Number of deaths occurring in county for calendar year 2004, regardless of residence.	
Crude/Age-Adjusted Rates		
Crude Death Rate (Per 1,000 population)	See Section III, page 287 for rate formulas. Rates are calculated using the number of 2004 deaths and the 2004 estimated population.	State of California, Department of Health Services, Death Records.
Age-Adjusted Death Rate (Per 100,000 population)	Rates are calculated using three-year average deaths for 2002-2004, estimated mid-year 2003 population, and 2000 population weights.	State of California, Department of Finance, Demographic Research Unit, Race/Ethnic Population with Age and Sex Detail, 2000-2050, May 2004.
Age-Specific Death Rates (Per 100,000 population)		
Age 1-4	See Section III, page 287 for rate formulas. Rates are calculated using a three-year average number of deaths for 2002-2004 and the estimated mid-year population for 2003 for the specified age groups.	State of California, Department of Health Services, Death Records.
Age 5-14		State of California, Department of Finance, Demographic Research Unit, Race/Ethnic Population with Age and Sex Detail, 2000-2050, May 2004.
Age 15-24		
Age 25-34		
Age 35-44		
Age 45-54		
Age 55-64		
Age 65-74		
Age 75-84		
Age 85+		
Fetal and Neonatal Deaths		
Fetal Deaths	See Section III, page 287 for ratio/rate formulas. Birth and death data are for calendar year 2004. Number of fetal deaths reported of 20 or more weeks of gestation. (Fetal deaths under 20 weeks gestation are not reported.) Ratio of fetal deaths (20 or more weeks of gestation) per 1,000 live births.	State of California, Department of Health Services, Fetal Death Records.
Fetal Death Ratio		State of California, Department of Health Services, Birth Records.
Neonatal Deaths Neonatal Death Rate		State of California, Department of Health Services, Death Records.

DEATHS (Continued)

DATA ITEM	DEFINITION/DESCRIPTION	DATA SOURCES
Infant Deaths/Rate (Death Master File)		
Infant Deaths	See Section III, page 287 for rate formulas. Number of 2004 deaths to resident infants under one year of age.	State of California, Department of Health Services, Death Records.
Infant Death Rate	Rate of 2004 infant deaths per 1,000 live births.	State of California, Department of Health Services, Birth Records.
Infant Death Rates (Birth Cohort File)		
Infant Death Rates by Mother's Race/Ethnic Group: All Race/Ethnic Groups White Black Hispanic Asian/Pacific Islander	See Section III, page 287 for rate formulas. Rate of infant deaths by mother's race/ethnic group in the 2003 birth cohort file per 1,000 live births in that race/ethnic group. First listed race was used to designate race group. White, Black, and Asian/Pacific Islander exclude Hispanic. White includes Other and Unknown races. The American/Alaska Native group is included in the "All Race/Ethnic Groups" category. Hispanic ethnicity includes any race group.	State of California, Department of Health Services, Birth Cohort Records.
Perinatal Deaths (Birth Cohort File)		
Total Perinatal Deaths Perinatal Death Rates by Mother's Race/Ethnic Group: All Race/Ethnic Groups White Black Hispanic Asian/Pacific Islander	See Section III, page 287 for rate formulas. Total number of 2003 birth cohort file neonatal deaths plus fetal deaths. Rate of 2003 birth cohort perinatal deaths by mother's race/ethnicity per 1,000 total births in the birth cohort file (live births plus fetal deaths). Definition of race/ethnicity is the same as for infant death rates (birth cohort file) shown above.	State of California, Department of Health Services, Birth Cohort Records.
Crude Death Rates By Cause (Per 100,000 population)		
Heart Disease.....	See Section III, page 287 for rate formulas. Rates are calculated using 2002-2004 three-year average deaths and estimated 2003 population. ICD 10 th Revision: ICD Codes I00-I09, I11, I13, I20-I51	State of California, Department of Health Services, Death Records.
Cancer.....	ICD Codes C00-C97	State of California, Department of Finance, Demographic Research Unit, Race/Ethnic Population with Age and Sex Detail, 2000-2050, May 2004.
Stroke.....	ICD Codes I60-I69	
Chronic Lower Respiratory Disease.....	ICD Codes J40-J47	
Unintentional Injuries.....	ICD Codes V01-X59, Y85-Y86	
Pneumonia/Influenza.....	ICD Codes J10-J18	State of California, Department of Finance, Demographic Unit, E-4 Population Estimates for Cities, Counties, and the State, 2001-2005, May 2005.
Diabetes/Mellitus.....	ICD Codes E10-E14	
Alzheimer's Disease.....	ICD Codes G30	
Chronic Liver Disease/Cirrhosis.....	ICD Codes K70, K73-K74	
Suicide.....	ICD Codes U03, X60-X84, Y87.0	
Homicide.....	ICD Codes U01-U02, X85-Y09, Y87.1	
Hypertension/Hypertensive Renal Disease.....	ICD Codes I10, I12	
Nephritis.....	ICD Codes N00-N07, N17-N19, N25-N27	

COMMUNICABLE DISEASES (Table 7)

DATA ITEM	DEFINITION/DESCRIPTION	DATA SOURCES
Disease Cases/Crude Rates		
Number of Reported Cases	See Section III, page 287 for rate formulas. Three-year average numbers of cases for 2002-2004. Rounding may cause small counties to have zero reported cases, but still have a case rate, or to have a different case rate for two diseases that show the same number of cases.	State of California, Department of Finance, Demographic Research Unit, Race/Ethnic Population with Age and Sex Detail, 2000-2050, May 2004.
Crude Case Rates	Rates are calculated using three-year average numbers of 2002-2004 communicable disease cases and the estimated 2003 population.	
Hepatitis	All hepatitis types—new cases only. Reports issued before the 2004 report included data on total cases (new and continuing cases); thus these data are not comparable with reports issued before 2004.	State of California, Department of Health Services, Division of Communicable Disease Control.
Measles	Rubeola.	
Shigellosis	All shigellosis types.	
Tuberculosis		State of California, Department of Health Services, Tuberculosis Control Unit.
Syphilis	Primary and secondary syphilis cases.	
Gonorrhea		State of California, Department of Health Services, Sexually Transmitted Disease Control Program.
Chlamydia		
AIDS Cases and Deaths		
AIDS Cases	Number of cumulative Acquired Immunodeficiency Syndrome (AIDS) cases reported at onset of illness from 1981 through 2005.	State of California, Department of Health Services, Office of AIDS.
Number of AIDS Deaths	Number of cumulative AIDS deaths from 1981 through 2005.	
Percent of Total AIDS Cases Resulting in Death	Percent of AIDS cases resulting in death from 1981 through 2005.	

SELECTED COUNTY HEALTH INDICATORS (Table 8)

DATA ITEM	DEFINITION/DESCRIPTION	DATA SOURCES
Traffic Accident Injuries in County	Number of 2003 accident victims in motor vehicles, including motorcyclists, bicyclists, and pedestrians by county of occurrence; excludes fatalities.	State of California, Department of California Highway Patrol, 2003 Annual Report of Fatal and Injury Motor Vehicle Traffic Collisions.
Traffic Accident Injuries		
Work-Related and Drug-Induced Deaths and Rates	<p>See Section III, page 287 for rate formulas.</p> <p>Three-year average number of work-related deaths 2002-2004 determined by underlying cause of death with ICD-10 codes U01-U03, V01-Y89, and injured at work coded as "yes."</p> <p>Rates are calculated using three-year average deaths for 2002-2004, estimated 2003 population for specific age groups, and 2000 standard population proportions.</p> <p>Three-year average number of drug-induced deaths for 2002-2004 determined by underlying cause of death with ICD-10 codes: F11.0-F11.5, F11.7-F11.9, F12.0-F12.5, F12.7-F12.9, F13.0-F13.5, F13.7-F13.9, F14.0-F14.5, F14.7-F14.9, F15.0-F15.5, F15.7-F15.9, F16.0-F16.5, F16.7-F16.9, F17.0, F17.3-F17.5, F17.7-F17.9, F18.0-F18.5, F18.7-F18.9, F19.0-F19.5, F19.7-F19.9, X40-X44, X60-X64, X85, Y10-Y14.</p> <p>Rates are calculated using three-year average deaths for 2002-2004, estimated 2003 population, and 2000 standard population proportions.</p>	<p>State of California, Department of Health Services, Death Records.</p> <p>State of California, Department of Finance, Demographic Research Unit, Race/Ethnic Population with Age and Sex Detail, 2000-2050, May 2004.</p>
Work-Related Deaths		
Work-Related Age-Adjusted Death Rates (per 100,000 population)		
Drug-Induced Deaths		
Drug-Induced Age-Adjusted Death Rates (per 100,000 population)		
Substance Abuse Treatment Admissions by Primary Drug Used	Number of persons listed by primary drug used that were admitted, regardless of their place of residence, to licensed or publicly-funded facilities for substance abuse treatment in the county during calendar year 2004. The counties of Sutter and Yuba combine their treatment services and are reported under Yuba County.	State of California, Department of Alcohol and Drug Programs, Office of Applied Research and Analysis.
Methamphetamine Cocaine Marijuana Alcohol		
Homicide	<p>Number of 2004 homicide deaths by weapons in county of occurrence.</p> <p>Number of homicide deaths by handguns in county of occurrence.</p>	State of California, Department of Justice, Criminal Justice Statistics Center. Willful Homicides Crimes 2004 by Type of Weapon.
Total Homicide by Weapons		
Homicide by Handguns		
Kindergarteners Needing One or More Immunizations	<p>Number of Fall 2005 conditional entrants to kindergarten who needed one or more immunizations including polio, DPT, MMR, Hep B, and/or Varicella.</p> <p>Percent of all kindergarten students needing immunizations (conditional entrants).</p>	State of California, Department of Health Services, Immunization Branch. Kindergarten Assessment-California, 2005. Table 2: Total Enrollment and Admission Status by County.
Number		
% Of All Kindergarten Students		

MEDI-CAL AND MEDICARE ELIGIBLES (Table 9)

DATA ITEM	DEFINITION/DESCRIPTION	DATA SOURCES
Medi-Cal Eligibles (2003)		
Number of Eligibles	Number of 2003 average monthly county Medi-Cal eligibles including fee-for-service, Health Care Plan (formally Prepaid Health Plan), and County Organized Health Systems.	State of California, Department of Health Services, Medical Care Statistics Section, California's Medical Assistance Program, Annual Statistical Report, Calendar Year 2003. March 2005.
% of County Population	Percent of estimated 2003 county population who are Medi-Cal eligibles.	State of California, Department of Finance, Demographic Research Unit, Race/Ethnic Population with Age and Sex Detail, 2000-2050, May 2004.
Eligibles by Race/Ethnicity: White, Black, Hispanic, American Indian/Alaska Native, Asian/Pacific Islander, Not Reported	Percent of total county Medi-Cal eligibles by race/ethnicity.	
Medicare Enrollees		
Enrollees Aged 65+	Enrollees include 2003 county residents aged 65 and older enrolled in Medicare hospital and/or supplemental medical insurance.	U.S. Department of Health and Human Services, Centers for Medicare and Medicaid Services.
% of County Population	Percent of 2003 estimated county population who were aged 65+ Medicare enrollees.	State of California, Department of Finance, Demographic Research Unit, Race/Ethnic Population with Age and Sex Detail, 2000-2050, May 2004.
Disability Beneficiaries	Beneficiaries include 2003 county residents under age 65 entitled to cash disability benefits for at least 24 consecutive months and those eligible solely on the basis of end-stage renal disease enrolled in hospital and/or supplemental medical insurance.	
% of County Population	Percent of 2003 estimated county population who were Medicare disability beneficiaries.	
Total Enrollees: Number Enrolled	Total number of county Medicare enrollees including aged 65+ and disability beneficiaries.	
% of County Population	Percent of 2003 estimated county population who were Medicare enrollees.	
Dual Eligibles		
% of Dual Eligibles for Medicare and Medi-Cal	Percent of county Medi-Cal eligibles in an average month during 2003 who are eligible for both the Federal "Medicare" and State "Medi-Cal" programs.	State of California, Department of Health Services, Medical Care Statistics Section.

MEDI-CAL DATA (Table 10)

DATA ITEM	DEFINITION/DESCRIPTION	DATA SOURCES
Medi-Cal FFS Users (2003)		
Number	Number of average monthly 2003 Medi-Cal fee-for-service (FFS) users includes Monterey, Napa, Orange, San Mateo, Santa Barbara, Santa Cruz, Solano, and Yolo county organized health system users with FFS exceptions for certain procedures. Percent of estimated 2003 county population who utilized Medi-Cal FFS health care services. Percent of 2003 estimated county Medi-Cal eligibles who utilized Medi-Cal FFS health care services.	State of California, Department of Health Services, Medical Care Statistics Section. California's Medical Assistance Program, Annual Statistical Report, Calendar Year 2003. March 2005.
% of Population		
% of Eligibles		
Denti-Cal (2003)		
Average Monthly Users	Number of average monthly 2003 county Medi-Cal beneficiaries using dental services paid by fee-for-service method.	State of California, Department of Health Services, Medical Care Statistics Section. California's Medical Assistance Program, Annual Statistical Report, Calendar Year 2003. March 2005.
Medi-Cal Deliveries (2003)		
Total by County of Beneficiary	Total number of Medi-Cal deliveries for county residents.	State of California, Department of Health Services. Medical Care Statistics Section. Medi-Cal Funded Deliveries, Calendar Year 2003. August 2005.
Fee-For-Service Total	Number of Medi-Cal deliveries for county residents paid by FFS.	
Managed Care Total	Number of Medi-Cal deliveries for county residents paid by capitation rate.	
Medi-Cal Funded Abortions (2003)		
Total by County of Beneficiary	Numbers exclude managed care plan services. Number of 2003 induced abortions funded by Medi-Cal FFS for county resident beneficiaries. NOTE: Data on abortions by provider type is no longer available.	State of California, Department of Health Services, Medical Care Statistics Section. Medi-Cal Funded Induced Abortions, Calendar Year 2003. March 2006.
Managed Care Plan Enrollees		
Total Managed Care Plan Enrollees	Number of county residents enrolled in Medi-Cal managed care plan as of July 2003.	State of California, Department of Health Services, Medical Care Statistics Section. California's Medical Assistance Program, Managed Care Annual Statistical Report, 2003. August 2004.
Medi-Cal Payments (2003)		
Number of Providers Paid: Physicians Dentists	Number of selected providers that received Medi-Cal FFS payments in 2003.	State of California, Department of Health Services, Medical Care Statistics Section. California's Medical Assistance Program, Annual Statistical Report, Calendar Year 2003. March 2005.
Average Monthly Dollar Amount	Total average monthly 2003 FFS payments made to providers for Medi-Cal services rendered to the county's Medi-Cal beneficiaries.	
Average Amount Per User	Average FFS payment per Medi-Cal user.	

PROGRAM CLIENTS/SERVICES (Table 11)

DATA ITEM	DEFINITION/DESCRIPTION	DATA SOURCES
Breastfeeding Initiation	Percent of breastfed infants based on three-year average number of births for 2002-2004 with known feeding method at time of hospital discharge. Infants include both those breastfed only and those supplementing breastfeeding with formula.	State of California, Department of Health Services, Maternal, Child, and Adolescent Health Branch, using data collected by the Genetic Disease Branch, Newborn Screening Survey.
Percent of Infants Breastfed During Early Postpartum		
Family Planning (FY 2004-05)	Number of clients served in Family Planning, Access, Care, and Treatment Program (Family PACT) during fiscal year 2004-05.	State of California, Department of Health Services, Office of Family Planning (OFP). All Visits Reported to OFP.
Family Planning Clients		
WIC (February 2006)	Number of low-income pregnant, breastfeeding, and postpartum women and children under age 5 receiving services under the Women, Infants and Children (WIC) Supplemental Nutrition Program as of February 1, 2006.	State of California, Department of Health Services, Women, Infants, and Children Supplemental Nutrition Branch.
Women and Children < 5 Receiving WIC Services		
CHDP	Number of children that received health assessments from Child Health and Disability Prevention (CHDP) in fiscal year 2003-04 reimbursed by Medi-Cal funds or the 100 percent State-funded program.	State of California, Department of Health Services, Children's Medical Services Branch.
Child Health and Disability Prevention Program Clients		
Child Health and Disability Prevention Program Providers		
CCS (FY 2004-05)	Number of cases in an average quarter for fiscal year 2004-05 for persons under age 21 receiving diagnostic, treatment, and therapy services from California Children Services (CCS) funded by Medi-Cal, Healthy Families, and CCS.	State of California, Department of Health Services, Children's Medical Services Branch.
California Children Services Cases		

PROGRAM CLIENTS/SERVICES (Continued)

DATA ITEM	DEFINITION/DESCRIPTION	DATA SOURCES
Developmentally Disabled (July 2005)	Number of persons served by residence county that received services (includes those with status codes High Risk Infant, Active, or in a Developmental Center) as of July 2005.	State of California, Department of Developmental Services, Planning and Research Branch.
Developmental Disability Consumers		
Aging Preventive Health (FY 2004-05)	<p>Unduplicated number of adults aged 55 and older who received clinical preventive health services in fiscal year 2004-05 as part of the PHCA Program.</p> <p>Number of client encounters with other PHCA program services during fiscal year 2004-05 including non-comprehensive visits, health clinics, health fairs, and group education.</p>	State of California, Department of Health Services, Preventive Health Care for the Aging.
Preventive Health Care for the Aging (PHCA) Comprehensive Health Assessment Clients		
Other Client Encounters		
Rehabilitation Services (FY 2004-05)	Number of clients who received vocational rehabilitation services in fiscal year 2004-05.	State of California, Department of Rehabilitation, Program Evaluation and Statistics Section.
Rehabilitation Services Clients		
Mental Health Services (FY 2004-05)	<p>Number of mental hospital admissions, both LPS and non-LPS admissions, in fiscal year 2004-05. (LPS refers to Lanterman, Petris, and Short; State legislation governing admissions to State mental hospitals.)</p> <p>Number of clients who received services from county mental health programs during fiscal year 2004-05.</p>	<p>State of California, Department of Mental Health, Hospital Operations.</p> <p>State of California, Department of Mental Health, Statistics and Data Analysis.</p>
State Mental Hospital Admissions		
Clients Receiving County Mental Health Services		
Hospice (December 2004)	Number of freestanding hospice facilities licensed as of the end of the 2004 calendar year.	State of California. Office of Statewide Health Planning and Development. Facility Listings, December 31, 2004.
Hospice Facilities		

HEALTH RESOURCES DATA (Table 12)

DATA ITEM	DEFINITION/DESCRIPTION	DATA SOURCES
General Acute Care Hospitals (2004)		
Total Number GAC Hospitals	Number of licensed community General Acute Care Hospitals (GAC) during calendar year 2004.	State of California, Office of Statewide Health Planning and Development. Annual Utilization Report of Hospitals Database, Calendar Year 2004. State of California, Department of Finance, Demographic Research Unit, Race/Ethnic Population with Age and Sex Detail, 2000-2050, May 2004.
Licensed GAC Beds	Number of licensed general acute care hospital beds for 2004.	
Licensed GAC Beds Per 1,000 Population	Number of licensed hospital beds per 1,000 total estimated 2004 county population.	
Total GAC Discharges	Number of licensed hospital patient discharges for 2004.	
Total GAC Occupancy Rate	Number of average daily hospital patient days divided by available licensed bed days.	
Average GAC Length of Stay	Number of hospital patient days divided by number of discharges.	
Long Term Care Facilities (2004)		
Total Number LTC Facilities	Number of licensed Long Term Care (LTC) facilities during calendar year 2004. Includes skilled nursing facilities, intermediate care, intermediate care/disabled disabled, and congregate living health facilities.	State of California, Office of Statewide Health Planning and Development. Annual Utilization Report of Long Term Care Facilities Data, Calendar Year 2004. State of California, Department of Finance, Demographic Research Unit, Race/Ethnic Population with Age and Sex Detail, 2000-2050, May 2004.
Licensed LTC Beds	Number of licensed LTC beds for 2004.	
Licensed LTC Beds Per 1,000 Population	Number of licensed LTC beds per 1,000 total estimated 2004 county population.	
LTC Discharges	Number of LTC discharges.	
LTC Occupancy Rate	Number of LTC patient days divided by available LTC bed days.	

HEALTH RESOURCES DATA (Continued)

DATA ITEM	DEFINITION/DESCRIPTION	DATA SOURCES
Other Facilities (2004)		
Community and Free Clinics	Number of community and free clinics licensed as of the end of the 2004 calendar year.	State of California, Office of Statewide Health Planning and Development. Facility Listings, December 31, 2004.
Specialty Clinics	Number of specialty clinics licensed as of the end of the 2004 calendar year.	
Home Health Agencies	Number of home health agencies licensed as of the end of the 2004 calendar year.	
Physicians and Dentists		
Licensed Physicians (FY 2004-05)	Number of licensed physicians and surgeons for fiscal year 2004-05.	Medical Board of California, Physicians and Surgeons valid licenses.
Licensed Dentists (March 2006)	Number of active licensed dentists as of March 20, 2006.	State of California, Department of Consumer Affairs. Office of Information Services.

Health Data Summaries for California Counties 2006
Center for Health Statistics, Department of Health Services

ADDITIONAL INFORMATION ON BIRTH, DEATH, COMMUNICABLE DISEASE, AND BREASTFEEDING STATISTICS

Mortality: A consistent use of the consensus set of health status indicators has been facilitated by reference to the causes of mortality coded according to the International Classification of Diseases, Tenth Revision (ICD-10). Cause of death coding using ICD-10 began with reporting mortality data for the 1999 calendar year. International Classification of Diseases, Ninth Revision (ICD-9) for coding cause of death was used in reporting mortality data for calendar years 1979 through 1998. The change to ICD-10 follows a worldwide standard created by the World Health Organization. In the United States, the National Center for Health Statistics (NCHS) sets the standards for implementation of the ICD-10.

Due to these changes, readers and users of these data are cautioned that mortality rates including data prior to 1999 are not necessarily comparable to those including 1999 forward, and should not be used to create trend data.

Morbidity: In general, the case definition of a disease is in terms of laboratory test results, or in the absence of a laboratory test, a constellation of clearly specified signs and symptoms that meet a series of clinical criteria. Case definitions for acquired immunodeficiency syndrome (AIDS), chlamydia, gonorrhea, hepatitis, measles, shigellosis, syphilis, and tuberculosis are contained in the "MMWR, Recommendations and Reports," Volume 46, Number RR-10, May 2, 1997.

Due to incomplete reporting of infectious and communicable diseases by many health care providers, caution is advised in interpreting morbidity data. Many factors contribute to the underreporting of these diseases. These factors include: lack of awareness regarding disease surveillance; lack of follow-up on support staff assigned to report; failure to perform diagnostic lab tests to confirm or rule out infectious etiology; concern for anonymity of the client; and expedited treatment in lieu of waiting for laboratory results because of time or cost constraints.

All vital events are subject to the vagaries of reporting. This fact forms the basis for the argument supporting the concept of sampling error in vital statistics. The problem of the uncertainty of reporting all events can be especially true for morbidity data. Therefore, AIDS, chlamydia, gonorrhea, hepatitis, measles, shigellosis, syphilis, and tuberculosis emphasize that the data show only reported number of cases. For more complete and technical definitions of types of morbidity, contact the Division of Communicable Disease Control or the Office of AIDS.

Birth Cohort Infant Mortality: The infant mortality rate is the number of deaths among infants under one year of age per 1,000 live births. It is a universally accepted and easily understood indicator, which represents the overall health status of a community.

Studies of infant mortality that are based on information from death certificates alone have been found to underestimate infant death rates for infants of all race/ethnic groups and especially for certain race/ethnic groups. This report displays both infant mortality rates from the 2004 Death Statistical Master File and the 2003 Birth Cohort-Perinatal Outcome File for comparison. However, infant mortality rates based on linked birth and infant death records in the Birth Cohort-Perinatal Outcome File generate more accurate estimates of the total number of infant deaths as well as more accurate race-specific infant mortality rates. The race used on the race-specific infant mortality tables is the race of the mother, thus both the numerator and the denominator used for rate calculations reflect the mother's race only.

Since delayed birth and death certificate data are included in the Birth Cohort-Perinatal Outcome Files after the Birth and Death Statistical Master Files have been closed to further processing, cohort files cannot be as timely as the Statistical Master Files. However, the Birth Cohort-Perinatal Outcome Files are more likely complete.

Race/Ethnicity: Race/ethnicity for population closely aligns with the 1997 Office of Management and Budget (OMB) revised minimum standards for collecting, maintaining, and presenting data on race and ethnicity. Descriptions of the minimum standards are in the 1997 OMB Directive 15, which may be reviewed at the following website: <http://www.whitehouse.gov/omb/fedreg/ombdir15.html>

Effective with the 2000 calendar year, this state began collecting up to three races on birth and death certificates to facilitate reporting of data on persons identifying with two or more races (multi-race). Our statistical master files also include a first listed race code. This report uses the multi-race code in determining the major race/ethnic group reported for births and deaths (non birth cohort). Mother's race is used in reporting all births and fetal deaths.

Using the multi-race code, race/ethnicity was grouped for births and deaths by determining Hispanic origin first, irrespective of race, and then second, determining the remaining non-Hispanic race categories. The Hispanic ethnic group includes any race, but is made up primarily of the White race. Of the non-Hispanic race categories, the next group that is selected for births and deaths (non birth cohort) is the "Two or More Races" group. The remaining mother's race data were sorted in single race groups as follows: American Indian/Alaska Native includes Aleut, American Indian, and Eskimo; Pacific Islander includes Guamanian, Hawaiian, Samoan, and Other Pacific Islander; Asian includes Asian Indian, Asian (specified/unspecified), Cambodian, Chinese, Filipino, Hmong, Japanese, Korean, Laotian, Thai, and

Vietnamese; Black includes Black or African American; White includes White, Other (Specified), Not Stated and Unknown. Not Stated and Unknown include data for mothers who declined to state their race or for whom the data was not obtainable for other reasons.

Race/ethnicity groups reported for birth cohort file births/infant deaths were selected based on the mother's first listed race unless Hawaiian appeared as the second or third listed race, in which case Hawaiian would be selected as the first race. Using the first listed race code is basically comparable with data reported for prior periods with the following caveats; the Asian/Pacific Islander group now excludes Aleut, American Indian, and Eskimo, previously reported as Asian/Other, which could have an impact on these small numbers; the White group includes the Not Stated and Unknown race/ethnic group data included in previous reports, but the relatively small number of these events in this large group may not substantially impact a county's rate. While data for the excluded groups are not reported individually, they are included in the All Race/Ethnic Groups category.

Nativity: The natality data were obtained from the Birth Statistical Master Files. Records with unknown birthweight were excluded from the total number of live births in calculating the percentage of births that were low birthweight and very low birthweight. This calculation methodology was also applied if records contained an "unknown" for any other specified birth risk factor such as mother's under aged 18 years, unmarried, under 12 years education, no first trimester prenatal care, and cesarean section.

Low birthweight has been associated with negative birth outcomes, and as an indicator of access problems and/or need for prenatal care services. Prevalence of low birthweight is defined as the percentage of live births weighing less than 2,500 grams (approximately 5.5 pounds). Birth rates of adolescents are also an indicator for other high-risk pregnancy factors. The adolescent birth rate for this report is defined as the number of births to mothers under aged 18 years per 1,000 female population under aged 18 years.

The prenatal care indicator, Month Prenatal Care Began, has been associated with access to care. Late prenatal care is defined as the percentage of mothers who did not begin prenatal care in the first trimester. However, it cannot be assumed that the remaining percentage of births were to mother's who received adequate prenatal care for their pregnancy even though prenatal care began in the first trimester. According to some researchers, this indicator fails to document whether or not prenatal care actually continues for the course of the pregnancy. Therefore, in addition to No First Trimester Prenatal Care, interested parties should review the County Health Status Profiles report, which includes a table on adequacy of prenatal care based on the Adequacy of Prenatal Care Utilization Index.

Infants Breastfed During Early Postpartum: The breastfeeding initiation data presented in this report were obtained from the Genetic Disease Branch, Newborn Screening Program with analyses by the Epidemiology and Evaluation Section, Maternal, Child and Adolescent Health Branch. The Newborn Screening Program collects feeding data from all mothers who gave birth in a California hospital, usually within 24 hours of birth.

Data on births that occurred outside of California, at home, or in-transit were not collected through this Program and are not represented in these statistics. These births, however, accounted for less than 1.0 percent of the total resident live births in California. The feeding data captured by the Newborn Screening Program were compiled as follows: 1) Breast only, 2) Formula only, 3) Breast and Formula, 4) Other, 5) Total Parenteral Nutrition/Hypereal, and 6) Unknown feeding method at the time of hospital discharge.

The breastfeeding initiation data presented are a composite of both “breast only” and “breast and formula” fed infants. Records that were of “unknown” feeding type were excluded from the analyses. The infant feeding data collected on the Newborn Screening form reflect the intentions of the mother at that time, and no follow-up survey is conducted to validate the accuracy of the information after the mother is discharged from the hospital. Caution should also be taken when analyzing breastfeeding initiation data alone because breastfeeding duration is not taken into consideration. Examination of breastfeeding initiation data along with duration data is recommended to thoroughly measure the effects of breastfeeding. Since appropriate data are not currently available, breastfeeding duration data are not presented in this report.

Crude Rates And Age-Adjusted Rates: The numerator data used to compute rates were generally three-year averages (unless otherwise indicated) compiled by county of residence of the decedent for the mortality statistics; county of residence of the mother for birth data (including linked birth-death data for infant mortality); and county of occurrence for morbidity data, except for AIDS, which was compiled by county of residence. Three-year averages tend to reduce the year-to-year fluctuations and increase the stability rates for vital events compared with rates calculated for single years.

A non-standardized rate (or "crude rate") is calculated by dividing a total number of vital events (e.g., deaths) by the total population at risk then multiplying by some convenient base (e.g., 100,000). Subpopulations (such as counties) with varying age compositions can have highly disparate death rates, since the risk of dying is primarily a function of age. Therefore, counties with a large component of elderly tend to have high death rates. Any unwanted effect of different age compositions among counties can be removed from the county death rates by the process of "age-adjustment." By removing the effect of different age compositions, a county's age-adjusted rate is directly comparable with rates of other counties, California, other states, and the Healthy People 2010 National Objectives.

Age-adjusted death rates are hypothetical rates obtained by calculating age-specific rates for each county and multiplying these rates by proportions of the same age categories in a "standard population," then summing the apportioned specific rates to a county total. The "standard population" used in the age-adjusted rates in this report is the 2000 United States (U.S.) Standard Population. The age-adjusted rates put all counties on the same footing with respect to the effect of age and permit direct comparisons among counties. It is important to understand that age-adjusted death rates should be viewed as constructs or index numbers rather than as actual measures of the risk of mortality. Crude death rates, which include the effect of age, are the rates that should be applied when measuring the actual risk of dying in a specific population. For further information on age-adjusted rates, see the NCHS report by Curtin and Klein on "Direct Standardization."

Data for the morbidity tables were not age-adjusted due to the unavailability of the morbidity data by age. Hence, only crude rates were calculated. Although age and aging do affect morbidity, the effect is not as prominent as its effect on mortality.

Birth cohort infant death rates are not age-adjusted. Since the deaths are linked to the births on a record-by-record basis, these rates are based on a numerator (deaths) and a denominator (births) from the same record. Age adjusting is not applicable to these data. Comparisons among counties reflect the actual risk of dying within the one year of birth in the cohort of births, and at the same time, are unaffected by confounding of different age compositions because the cohorts are all of the same age (under one year).

Reliability Of Rates: All vital statistics rates, including morbidity rates, are subject to random variation. This variation is inversely related to the number of events (e.g., death) used to calculate the rate. Small frequency in the occurrence of an event results in the greater the likelihood that random fluctuations will be found within a specified time period. Rare events are relatively less stable in their occurrence from observation to observation. Even present day statewide crude death rates may be interpreted as "rare" events occurring on the average of less than one death in 150 persons in the course of a year.

As a consequence, counties with only a few deaths, or a few cases of morbidity, can have highly unstable rates from year-to-year. The observation and enumeration of rare events is beset with uncertainty. The observation of no vital events is especially hazardous, regardless of the size of the population. This report reduces some year-to-year fluctuation in the occurrence of rare events by basing some rates on three-year average number of vital events (e.g., 2002-2004), divided by the population in the middle year (e.g., 2003). The "standard error" of a death rate and "coefficient of variation" (or relative standard error) provide a rational basis for determining which rates may be considered "unreliable."

Although reliability of a rate is not either-or/on-off in this report, counties with a relative standard error greater than or equal to 23 percent of the rate or percent are marked with an asterisk (*). This criterion conforms to the standard used by the NCHS in determining the reliability cut-off for rates and percents. In addition, rates of zero cannot be calculated and are considered indeterminate. Furthermore, whenever the standard error is indeterminate, the confidence limits are not calculated.

The 95 percent confidence limits depict the region within which (if data similar to the present set were independently acquired on 100 separate occasions) the rate would probably occur in 95 of those sets of data. In 5 of those 100 data sets, the rate or percent would fall outside the limits.

Finally, for appropriate statistical methodologies in comparing independent rates or percentages, please see the NCHS reports listed in the bibliography by Curtin and Klein on "Direct Standardization" and by Kleinman on "Infant Mortality."

NOTES

FORMULAS USED IN THIS REPORT

$CDR = \left(\frac{nD}{Npop} \right) \times 1,000 \text{ or } 100,000$ $ADR = \sum W_a \left(\frac{nD_a}{Npop_a} \right) \times 100,000$ $ASDR = \left(\frac{nD_a}{Npop_a} \right) \times 100,000$ $SE_x = \left(\frac{CDR}{\sqrt{nD}} \right)$ $SE_y = \sqrt{\sum \frac{(W_a \times ASDR)^2}{nD_a}}$	$RSE_x = \left(\frac{SE_x}{CDR} \right) \times 100$ $RSE_y = \left(\frac{SE_y}{ADR} \right) \times 100$ <p>Lower 95% CL = $ADR - (1.96 \times SE_y)$</p> <p>Upper 95% CL = $ADR + (1.96 \times SE_y)$</p> $FDR = \left(\frac{nD_f}{LB} \right) \times 1,000$	$NDR = \left(\frac{nD_n}{LB} \right) \times 1,000$ $PDR = \left(\frac{nD_f + nD_n}{LB + nD_f} \right) \times 1,000$ $IDR = \left(\frac{nD_1}{LB} \right) \times 1,000$ $GFR = \left(\frac{LB}{Npop_b} \right) \times 1,000$ $BF = \left(\frac{LB_1}{LB_2} \right) \times 100$
<p>Where:</p> <div style="display: flex; justify-content: space-between;"> <div> <p>CDR = Crude death rate</p> <p>ADR = Age-adjusted death rate</p> <p>ASDR = Age-specific death rate</p> <p>FDR = Fetal death ratio</p> <p>NDR = Neonatal death rate</p> <p>PDR = Perinatal death rate</p> <p>IDR = Infant death rate</p> <p>GFR = General fertility rate</p> <p>BF = Breastfed infants</p> <p>nD = Number of deaths</p> <p>Npop = Population size</p> <p>$Npop_a$ = Population size in same age group</p> <p>$Npop_b$ = Female population aged 15-44</p> </div> <div> <p>SE_x = Standard error of a crude death rate</p> <p>RSE_x = Relative standard error of a crude death rate</p> <p>SE_y = Standard error of an age-adjusted death rate</p> <p>RSE_y = Relative standard error of an age-adjusted death rate</p> <p>CL = Confidence limit</p> <p>nD_a = Number of deaths in an age group</p> <p>nD_f = Number of fetal deaths 20 or more weeks gestation</p> <p>nD_n = Number of neonatal deaths under 28 days of age</p> <p>nD_1 = Number of infant deaths under one year of age</p> <p>LB = Live births</p> <p>W_a = Age-specific weight (standard population proportion)</p> <p>LB_1 = Live births with breastfeeding initiated</p> <p>LB_2 = Total live births with known feeding method</p> </div> </div>		

PROCEDURE FOR CALCULATING AGE-ADJUSTED RATES BY THE DIRECT METHOD

Age-adjusted rates calculated in this report follow the procedure that was used to set the Year 2010 National Objectives. The standard population was the year 2000 United States population. The data below were taken from Table 4 for 2002-2004 average deaths for Alameda County.

ALAMEDA COUNTY					
AGE GROUPS	2002-2004 DEATHS (AVERAGE) (A)	2003 POPULATION (B)	AGE-SPECIFIC RATE/100,000 (C)	2000 U.S. STANDARD MILLION PROPORTIONS (D)	WEIGHTED RATE FACTORS (E)
TOTAL	9,530.7	1,495,367	637.3		
Unknown	3.7				
<1	99.7	20,978	475.1	0.013818	6.6
1-4	14.0	81,656	17.1	0.055317	0.9
5-14	27.3	200,699	13.6	0.145565	2.0
15-24	131.7	192,900	68.3	0.138646	9.5
25-34	193.3	244,908	78.9	0.135573	10.7
35-44	385.0	253,994	151.6	0.162613	24.6
45-54	825.7	213,759	386.3	0.134834	52.1
55-64	1,084.3	135,873	798.0	0.087247	69.6
65-74	1,469.3	75,701	1,941.0	0.066037	128.2
75-84	2,648.0	54,548	4,854.4	0.044842	217.7
>84	2,648.7	20,351	13,014.9	0.015508	201.8
AGE-ADJUSTED RATE-----					723.7

- STEP 1:** Array the data of three-year average number of deaths and population for 11 age groups in columns A and B.
- STEP 2:** Calculate age-specific rates by dividing the number of deaths in column A (numerator) by the population in column B (denominator). Multiply the result (quotient) by the base of 100,000 to obtain the rates in column C.
- STEP 3:** Multiply each age-specific rate in column C by the corresponding 2000 U.S. Standard Population proportion in column D and enter the result in column E.
- STEP 4:** The values for each age group in column E are summed to obtain the Age-Adjusted Death Rate for Alameda County of 723.7 per 100,000 population.
- STEP 5:** Repeat Steps 1 through 4 for each county and the statewide total. Note that the 2000 U.S. Standard Million proportions remain the same for each county and the state.
- STEP 6:** Direct comparisons can now be made among the counties, with the removal of the effect that varying county age compositions may have on death rates.

FOOTNOTES

- * denotes a rate, ratio, or percentage with a relative standard error that is greater than or equal to 23 percent and is considered unreliable. Caution should be used in interpreting unreliable rates.
- ** denotes that limited data are available for this county.
- + denotes that the standard error is indeterminate because the rate is based on zero events.
- ++ denotes that Sutter and Yuba counties combine treatment services. Admission numbers or client counts are shown under Yuba county.
- ^ denotes greater than zero and less than four observations.
- “a” denotes that rates and ratios are not calculated if greater than zero, but fewer than five events.
- “b” denotes that ratios and rates are not calculated for fewer than 1,000 births or population in a city, county, or specific age group.
